

GitHub SSH Key Creation Procedure (Windows)

Step 1: Open PowerShell

Press Windows Key + X and select Windows Terminal or PowerShell.

Step 2: Generate SSH Key

Run the command:

```
ssh-keygen
```

Press Enter to accept default file location.

Step 3: Set Passphrase (Optional)

Enter a passphrase or press Enter twice to skip.

Step 4: Confirm Key Creation

Keys will be stored in:

```
C:\Users\YourUsername\.ssh\
```

Files:

```
id_rsa (private key)
```

```
id_rsa.pub (public key)
```

Step 5: View Public Key

Run:

```
cat ~/.ssh/id_rsa.pub
```

Copy the full output.

Important Tips:

- Never share your private key.
- Backup your .ssh folder.
- Use a passphrase for security.

Use ED25519 for better security:

```
ssh-keygen -t ed25519
```
